Hot Mopping on Nailable Decks

Interpretations of State and Local Building Codes 1998 California Building Code: Chapter 15 Revision Date: July 1999

Page 1 of 1

## I. Requirements for Built-Up Roofing

Table 15-E of the Building Code requires that, where built-up roofing is applied over an approved nailable deck, the base ply shall be nailed using not less than one fastener for each  $1^{1}/_{_3}$  square feet.

## II. Acceptable Conditions for Hot-Mopping a Nailable Deck

Hot-mopping the base ply on a nailable deck shall not be permitted except where all of the following three conditions are met:

A. The built-up roofing system to be used is approved and listed by Underwriters Laboratories, Inc. or another approved listing agency.

- B. Such listing permits the base ply to be hot-mopped in place.
- C. A representative of the roofing manufacturer provides the Department with a signed certification for each roofing installation verifying that the roofing has been applied in strict conformance with the specifications of the manufacturer and with the recommendations of the approving agency.
